Caring For Your Big Kahuna Portable Shower

We Recommend These Simple Steps

- Leave Lid Off To Air Out. (Do Not Lose the Lid)
- Keep The Custom Box: Just in case you need to return it or have it repaired

Long-Term Storage Or Light Use

1. Fill container to 3/4 or completely full
2. Add 1/2 Cap Full Of Bleach
3. Run pump to circulate bleach completely through the system
4. Let It Sit Overnight...
5. Dump out the Water
6. Refill your unit with fresh water and run it completely through the unit to rinse out the bleach. This will keep the hose, container, pump and showerhead germ free for years.

Additional Tips:

- Our pumps are designed to lift out to allow cleaning of the whole inside of the container...
- Dry off the chrome handle, to keep calcium/lime from eating the chrome plating
